

VELOCITY

FREEDOM TO MOVE

What makes these wetsuits so special is the unique combination of **three different full-stretch neoprene materials**. This selective fabric strategy allows us to deliver a suit with enhanced durability and value while not compromising on fit, feel and performance. We call this **PROGRESSIVE FULL-STRETCH** and it's only available in the Velocity Series.

It all starts with **BARE-FIT**, our ergonomic design process involving complex patterns with articulated arms and legs. Next, we determined the ideal performance requirements in each zone of the wetsuit and selected specific FULL-STRETCH fabrics to match the required performance characteristics. Simply put, **PROGRESSIVE FULL-STRETCH** is an intelligent approach to wetsuit design and the results are superior comfort and performance at an economical price.

PROGRESSIVE FULL-STRETCH

THE RIGHT STRETCH IN THE RIGHT PLACE

PFS1

Our highest full-stretch fabric providing elongation with the least amount of force. For maximum mobility with minimum restriction.

PFS2

A unique combination of FULL-STRETCH materials for more durability, shape retention and compression resistance.

PFS3

Special full-stretch material applied in areas needing maximum durability and abrasion resistance.

7MM + 5MM + 3MM FULL + 2MM SHORTY VELOCITY

THE RIGHT STRETCH IN THE RIGHT PLACE

Designed to be durable and dependable, the Velocity offers great all-around performance in a full-stretch wetsuit.

MATERIAL

- PROGRESSIVE FULL-STRETCH neoprene for exceptional stretch and overall performance

INNOVATION

- Incorporates our newly advanced PROGRESSIVE FULL-STRETCH technology. This technology uses the latest in full-stretch neoprene by placing varying degrees of full-stretch panels into specific performance zones of the suit improving fit, feel, comfort and overall performance

COMMON FULL FEATURES (7MM + 5MM + 3MM)

- Heavy-duty back zipper with skin-to-skin internal sealing flap
- Seamless underarms for superior comfort
- Loop at base of zipper assists donning
- Embossed back knee flex panels
- PROTEKT knee protection provides the next generation of abrasion and wear resistance
- Anatomically correct pattern for three dimensional fit throughout
- Heavy-duty ankle zippers for easy donning

OTHER FULL FEATURES

- 7MM + 5MM: Comfortable contoured 5MM GLIDESKIN collar with 360 degree neck seal minimizes water entry through neck/zipper
- 7MM + 5MM: Internal skin-in flip seals at mid-forearm and mid-calf to reduce water entry
- 7MM + 5MM: Double glued with SECURE-LOCK construction
- 3MM: Comfortable contoured 2MM GLIDESKIN collar with 360 Velcro™ adjustment
- 3MM: Rolled GLIDESKIN wrist and ankle seals
- 3MM: Flatseam construction throughout for stretch and comfort

SHORTY FEATURES

- Comfortable contoured 2MM GLIDESKIN collar with 360 Velcro™ adjustment
- Heavy-duty back zipper
- Seamless underarms for superior comfort
- Loop at base of zipper assists donning
- Rolled GLIDESKIN arm and leg seals
- Flatseam construction throughout for stretch and comfort
