

REACTIVE

ULTRA WARMTH®

THE WORLD'S WARMEST WETSUIT MADE WITH CELLIANT® INFRARED

Reactive uses Celliant® Infrared technology to turn wasted body heat into usable infrared energy. The lining is enhanced with 13 thermo-reactive minerals woven into the fabric of the wetsuit that react to your body heat converting it to infrared energy and reflecting it back to the body increasing circulation and body warmth.

7MM + 5MM + 3MM REACTIVE

THE WORLD'S WARMEST WETSUIT MADE WITH CELLIANT® INFRARED

MATERIAL

- ELASTEK FULL-STRETCH neoprene combined with CELLIANT® fabric for our highest degree of warmth, stretch and comfort

INNOVATION

- Reactive uses Celliant® Infrared technology to turn wasted body heat into usable infrared energy. The lining is enhanced with 13 thermo-reactive minerals woven into the fabric of the wetsuit that react to your body heat converting it to infrared energy and reflecting it back to the body increasing circulation and body warmth.
- Using our patented No Stitch Technology (NST) process, until now only found in our drysuits, Reactive is made without a single seam stitching keeping you drier, warmer and diving longer

COMMON FEATURES (7MM + 5MM + 3MM)

- Velcro adjustment on collar features a booklet-style cover, to protect your suit from snags and pilling
- Seamless underarms for superior comfort and mobility
- Extra-long (21") S-Lock2 back zipper with offset tooth design and PU coated zip tape guards against water entry
- Skin-to-skin double internal sealing zipper flap
